EXOGEN®

Ultrasound Bone Healing System

EXOGEN®

- Is FDA-approved to accelerate healing of certain fresh fractures and fractures that won't heal on their own*
- Works in just 20 minutes a day to speed healing
- Features ultrasound technology
- May help get you back to normal activities faster
- Is covered by most insurance plans

Ask your doctor about

EXOGEN Ultrasound

* Summary of indications for Use: The EXOGEN 4000+™ Ultrasound Bone Healing System is indicated for the non-invasive treatment of established non-unions* excluding skull and vertebrae

* EXOGEN is indicated for accelerating the time to a healed fracture for fresh, closed, posteriorly displaced distal radius fractures and fresh, closed or Grade I open distal humerus fractures in skeletally mature individuals when these fractures are orthopaedically managed by close reduction and cast immobilization.

Contraindications: There are no known contraindications for the EXOGEN device. Warnings and precautions pertaining to the treatment of either condition may be found at www.exogen.com or by calling 1-800-836-4080

† A non-union is considered to be established when the fracture site shows no visibly progressive signs of healing for six months

Faster fracture* healing may be yours in just 20 minutes a day

Ask your doctor about

EXOGEN®

Ultrasound Bone Healing System

If you have a broken bone,
you're not alone

- 15.3 million fractures occur annually¹

Up to 10% of fractures may
be at risk for delayed healing
or not healing at all²

- Some factors that may contribute to this include certain risk factors and fracture location

If you have any of these risk factors,
your fracture may be difficult to heal

The **EXOGEN**® Ultrasound Bone Healing System may help get you back to your normal activities faster

- Accelerates the time it takes to heal certain fresh fractures⁷
- Heals fractures that won't heal on their own³
- Uses unique ultrasound technology
- Takes only 20 minutes a day

Is there anything else I can do
to help heal my fracture faster?

Many physicians may
recommend that you:

- ☐ Avoid tobacco products
- ☐ Maintain a well-balanced diet
- ☐ Increase your daily supply of calcium
- ☐ Take pain relievers only as directed
- ☐ Get plenty of rest
- ☐ Surround yourself with supportive people and a healthy environment
- ☐ Follow up with postsurgery rehabilitation programs

The only technology approved by the FDA to accelerate healing of fresh fractures and bones that won't heal on their own.^{3,7}
